

Ensaios de Campo e Instrumentação de Obras - Dilatômetro-Prof. Massao Futai

PROPRIEDADE	VARIÁVEIS	FORMULAÇÃO	REFERÊNCIA
K ₀ (areias)	$f(K_d, \emptyset') = f(A, \sigma'_V, u_0, q_d)$	Empírica	Marchetti (1980)
K ₀ (argilas)	$f(K_d) = f(A,\sigma'_V,u_0)$	Semi-empírica	Jamiolkowski et a (1985)
Ø' (areia)	$f(K_0, \\ \sigma'_V, P) = f(A, \sigma'_V, u_0, q_d)$	Teórica	Jamiolkowski et al (1985) e Marchett (1980)
Su (Argila SA)	$f(K_d, \sigma'_V) = f(A, \sigma'_V, u_0)$	Empírica	Marchetti (1980)
Su (Argila NA)	$f(p_0) = f(A, u_0)$	Empírica	Marchetti (1980)
$M = 1/m_V$	$f(E_d,I_d) = f(A,B,U_0)$	Semi-empírica	Marchetti (1980)
p _C ' (areias)	$f(K_d, \emptyset') = f(A, \sigma'_V, u_0, q_d)$	Semi-empírica	Jamiolkowski et a (1985)
p _C ' (argila)	$f(K_d) = f(A, \sigma'_V, u_0)$	Empírica	Marchetti (1980)
E ₂₅ (areia)	$f(E_d) = f(A,B)$	Semi-empírica	Jamiolkowski et a (1985)
E (argila)	$f(m,v) = f(A,B,u_0,v)$	Semi-empírica	Marchetti (1980)
