V. Pudenda Externa

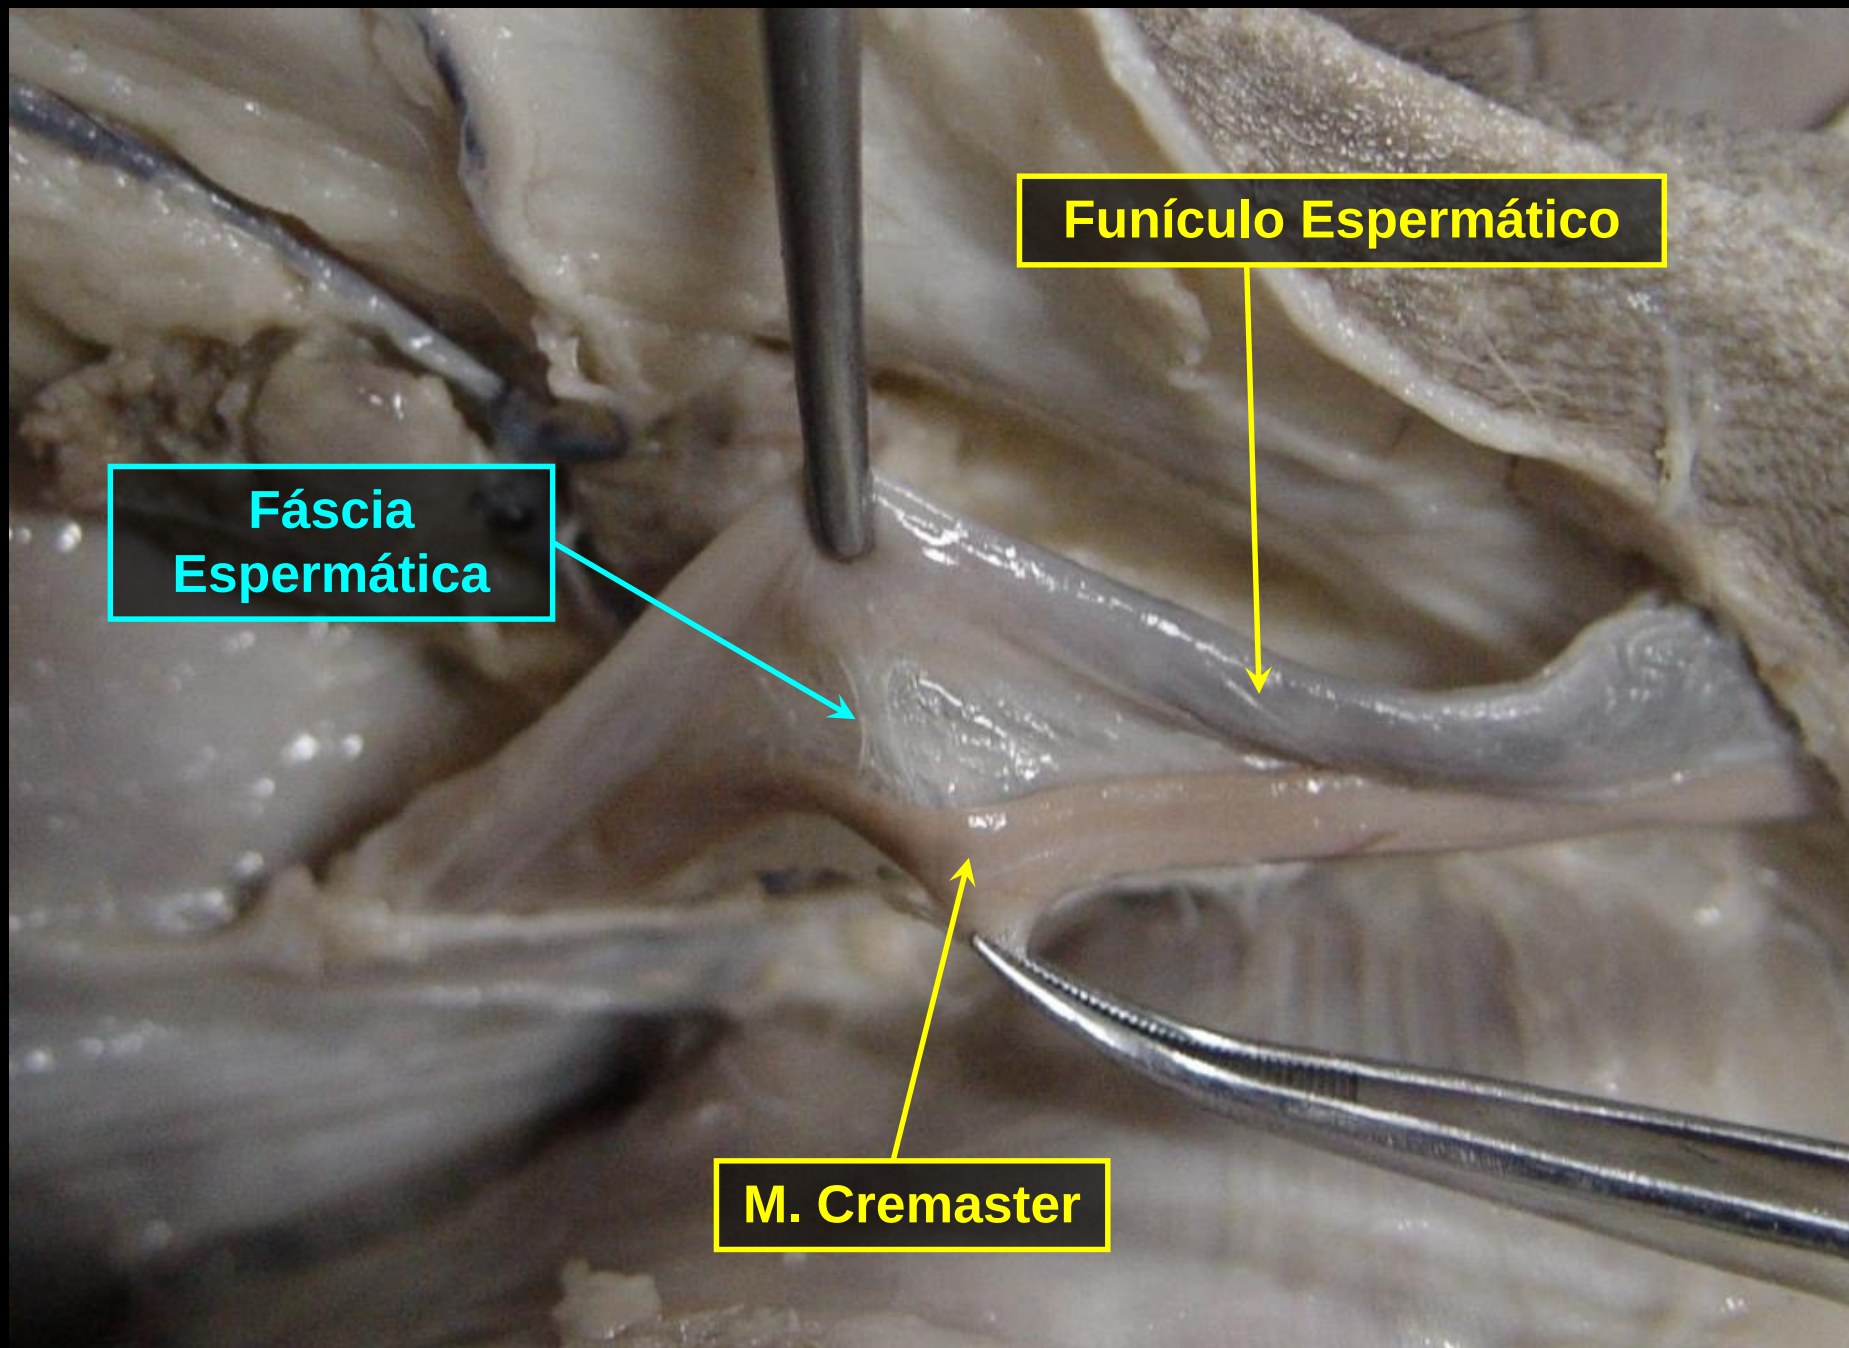

This anatomical photograph shows a dissection of the male inguinal region. The external pudenda vessels (V. Pudenda Externa and A. Pudenda Externa) are visible, along with the genitofemoral nerve (N. Genitofemoral). The superficial inguinal ring (Anel Inguinal Superficial) and the spermatic funicle (Funículo Espermático) are also labeled. The dissection is held open with surgical forceps.
