## Abstraction

- 1 an abstract idea or term.

## Abstract

Merriam-Webster (2017). English Dictionary.  
<https://www.merriam-webster.com/dictionary/>

## Abstraction

## Abstract

- ① disassociated from any specific instance (abstract entity);
- ② difficult to understand (abstruse, abstract problems);
- ③ insufficiently factual (formal).
- ④ expressing a quality apart from an object (the word poem is concrete, poetry is abstract)

## Economic Sectors

- ① Primary Sector: Raw Materials;
- ② Secondary Sector: Industry;
- ③ Tertiary Sector: Services.  
Ex: Reuse of Waste  $\Rightarrow$  Raw Material.

## Tertiarization

- 1 Growth of Tertiary sector is called tertiarization;

“In the United States 70 percent of the workforce works in the service sector; in Japan, 60 percent, and in Taiwan, 50 percent. These are not necessarily busboys and live-in maids. Many of them are in the professional category. **They are earning as much as manufacturing workers, and often more.**”

Ōmae (1990). The borderless world: power and strategy in the interlinked economy.  
<https://books.google.com.br/books?id=sznZAAAAIAAJ>

## Tertiarization

### 1 In Software:

- 1 Discussion Between **Software Industry** or **Software Service Provider**.
- 2 Software Companies might make more profit as service providers instead of industrial production.

“In the United States 70 percent of the workforce works in the service sector; in Japan, 60 percent, and in Taiwan, 50 percent. These are not necessarily busboys and live-in maids. Many of them are in the professional category. **They are earning as much as manufacturing workers, and often more.**”

## Protocol

## Protocol

- ① code prescribing strict adherence to correct etiquette and precedence;
- ② a set of conventions (rules) governing the treatment and especially the formatting of data;
- ③ Must be agreed upon by the parties involved. Therefore, a protocol may be developed into a technical **standard**.

Merriam-Webster (2017). English Dictionary.  
<https://www.merriam-webster.com/dictionary/>

Comer (2000). Internetworking with TCP/IP.  
[https://books.google.com.br/books?id=KW\\_xnQAACAAJ](https://books.google.com.br/books?id=KW_xnQAACAAJ)

## Hypertext Transfer Protocol (HTTP)

- 1 Used to transfer hypertext, may be used to transmit other data formats;
- 2 Most used transport protocol to transmit Web Services: a services model.

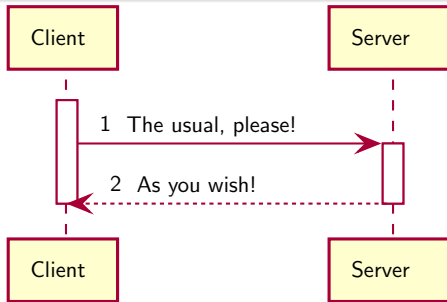

## HTTP Concepts

Concept	Description
Client Request	Client submits a request for a resource
Resource	Data hosted by server
Action Verb	Action to perform on Resource as requested by Client (e.g. GET or POST)
URL/URI	Universal Resource Location/Identifier
HTTP Version	Protocol Version to be <b>accepted</b> by parties
MIME	Multipurpose Internet Mail Extensions is a standard for data format specification
Server Header	Basic Information (Greeting) to Client

Fielding (2000). Architectural Styles and the Design of Network-based Software Architectures..  
<https://www.ics.uci.edu/~fielding/pubs/dissertation/top.htm>

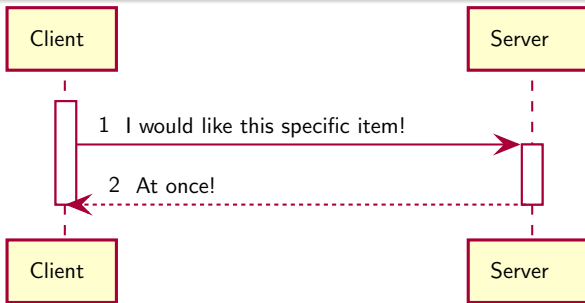

## Stateful (*Full Service*)

- 1 The server must store a state.
  - 1 (e.g. the server must “remember” the client.)

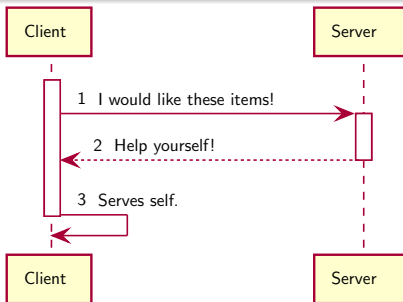

## Stateless (*Fast Food*)

- ① The server does not store any state.
  - ① (e.g. the client must send **all** details for every request.)

## Back-end Service (*Self Service*)

- 1 The server provides incomplete data that must be processed by the client.
  - 1 (e.g. the client must execute part of the work.)
- 2 This client might be an intermediary server (front-end) to the final client.

## Simple Object Access Protocol – SOAP

- Platform independent format;
- Object-Oriented;
- Recommends XML-based format transfer;
- Web Services Message Protocol.

## SOAP Concepts

- Extensions:
  - WS-Security: Encryption and Authentication;
  - WS-Reliable Messaging: Message Delivery Reliability (Receipt).
- Process Model, e.g.:
  - WS-BPEL.
- Interface and Data Structure Specification, e.g.:
  - UDDI;
  - WSDL with XSD (XML Schema Specification – Data Structure).
- Message Protocols, e.g.:
  - SOAP.

## REST Concepts

- RESTful is a system that intentionally complies to REST;
- Accidentally RESTful: a system that unintentionally complies to REST;
- Interface can be Specified with WADL;
- HTTP actions: e.g. GET, POST, PUT, PATCH, DELETE as methods;
- MIME types: the client may ask for a specific format per request.

- Three types of services should be identified:
  - ① Utility Services: Generic behavior that are useful for varied systems;
  - ② Business Services: Services that implement specific business activities;
  - ③ Coordination: Services that control a business process, often invoking other services.

Sommerville (2015). Software Engineering, Tenth Edition.

<https://www.pearson.com/us/higher-education/program/Sommerville-Software-Engineering-10th-Edition/PGM35255.html>

- Several techniques from Components are applicable:
  - Interface Design;
  - Interface Contracts;
  - Data Structures used for communication.

Sommerville (2015). Software Engineering, Tenth Edition.

<https://www.pearson.com/us/higher-education/program/Sommerville-Software-Engineering-10th-Edition/PGM35255.html>

## Interface and Data Structure Specification

- How to call each service?
  - Create design models;
  - Select interfaces to be externalized;
  - Define data types to be transferred.

### **PIM Service Interface Traditional WS**

```

+addContact( contact : Contact ) : boolean
+retrieveContact( name : String ) : Contact
+updateContact( contact : Contact, name : String ) : boolean
+deleteContact( name : String ) : boolean
    
```

## Service Cooperation and Process Model

- How does the service invocations cooperate?
  - Create a process model with business activities;
  - Each business activity is implemented as a service;
  - Define contracts for each activity.
- Specify and Document Interfaces:
  - Write WSDL (SOAP) or WADL (REST);
  - Publish the interface for clients.

Sommerville (2015). Software Engineering, Tenth Edition.

## Service Coding

- Services may be written from scratch or by using frameworks;
- Frameworks are capable of following required standards;
- Some frameworks include compilers which parse and/or generate WSDL or WADL.

Sommerville (2015). Software Engineering, Tenth Edition.

<https://www.pearson.com/us/higher-education/program/Sommerville-Software-Engineering-10th-Edition/PGM35255.html>

## Web Services Installation/Deployment

- Web Services are often installed on top of Internet protocols, e.g.:
  - HTTP (Hypertext Transfer Protocol);
  - SMTP (Simple Mail Transfer Protocol);
  - XMPP (Extensible Message Passing Protocol).
- The server application may be standalone or run on top of a web server.

Sommerville (2015). Software Engineering, Tenth Edition.

<http://www.pearson.com/us/higher-education/program/Sommerville-Software-Engineering-10th-Edition/PGM35255.html>

## Web Services Installation/Deployment

- Web Services testing is an open issue;
- From the perspective of clients, it might be impossible to test all services;
- Different services providers might have different implementations for the same interface;
- Services might be changed dynamically.

Sommerville (2015). Software Engineering, Tenth Edition.
