System Setup Guide

1. Introduction

Before starting the exercise work in your SAP Learning System Access training environment, you will need to prepare yourself based on the SAP Learning System Access General User Guide and this course relevant Setup Guide. This document provides all additional training system setup information that you need to successfully use your SAP Learning System Access training environment for the booked course.

2. Last Update of This Document (“Change History”)

Last Update: February 2023

3. Global Training System Support

Please check the Help section on the SAP Learning System Access portal for detailed information.

4. System Landscape Information

This class is offered in Live Access. The tenant information for the live access is listed in the following table:

Tenant	User	URL
Team_A	A##	https://sapeduc4la01.eu10.hcs.cloud.sap

Note:

Your designated Group Number (##) is displayed in the top area of your SAP Live Access system window. Every time you are asked to make an input containing the ## or XX symbols, you need to replace them with the Group Number consistently throughout the course exercises. Group numbers 00 to 40 are available

Table 1: Backend Systems

Server	Wdflbmt7330.wdf.sap.corp
SID	HDB
Instance	02
Role of the server	HDB HANA 2.0 REV34

Server	Wdflbmt7330
BPC	http://wdflbmt7330.wdf.sap.corp:50001
Role of the server	SAP BPC 11.0 for BW4/HANA

Server	Wdfldbmt7326
Portal URL	http://wdfldbmt7326:8080/BOE/BI
Role of the server	BI Platform 4.2 SP6

Server	Wdfldbmt7326
NW IDP	http://wdfldbmt7326.wdf.sap.corp:50001
Role of the server	SAP IDM Federation 7.2 Identity Provider with SAML SSO

Server	Wdfldbmt7330
DWC	https://sapeducdwc.eu10.hcs.cloud.sap/dwaas-ui/index.html#/home
Role of the server	SAP DWC

Important new notes:

- The SAC tenants have been updated with QRC Wave **2023.2**.
- The SAC tenants are setup with SAML SSO using a custom NW IDP running inside the landscape.
 - SAC users are dynamically created at login. No need to add SAC users manually.
 - SAC users are assigned the SAC custom role by default.
- ONLY GOOGLE CHROME is supported. If IE or another browser is used, then the user will not be able to perform 90% of the exercises in this class.
- Close the browser and clear your cache when you are logging in as another user or if you have any issues.
- Do NOT delete anything that you did not create.

5. Logon Information to Access SAP Training Systems

SAP Learning Hub training courses offer an SAP Learning System Access training system to accompany course exercises. To log on to this training system, please follow the steps explained below.

Note:

We also recommend to read the [SAP Learning System Access: General User Guide](#) to learn how to use the SAP Learning System Access portal.

When the system is ready after enrollment, click on the button called Access.

You might need to confirm your group number. After this, your system opens in a new tab.

Note:
To end the session and stop subscription consumption, always close the tab.

Choose the desired course in the SAP Live Access portal and request the deployment of the corresponding training system. Access to the training system is possible via the SAP Live Access portal after the deployment is finished.

User ID and Passwords for the Course:

Table 2: Team_A

System	User Name / ID	Password
SAC	A##	Welcome1

Your designated Group Number is being displayed in the top area of your SAP Live Access system window. Every time you are asked to make an input containing the ## or XX symbols, you need to replace them with the Group Number consistently throughout the course exercises. Group numbers 00 to 40 are available.

Table 3: Backend Server Users

System	User Name/ID	Password
BW/4HANA	WSBW	Welcome1
S/4HANA	WSS4H	Welcome1
RemoteCO HANA	WSHANA	Welcome1
Universe	SAC	Welcome1

6. Additional System Setup Tasks

Please initialize SAC course as follows:

1. Go to Start Menu.
2. Scroll down and click on Initialize_SAC.
3. Click yes when prompted.

4. The script will copy all SAC course folders and will open folder "N:\SAC".
5. Open the relevant course folder from the list of folders.

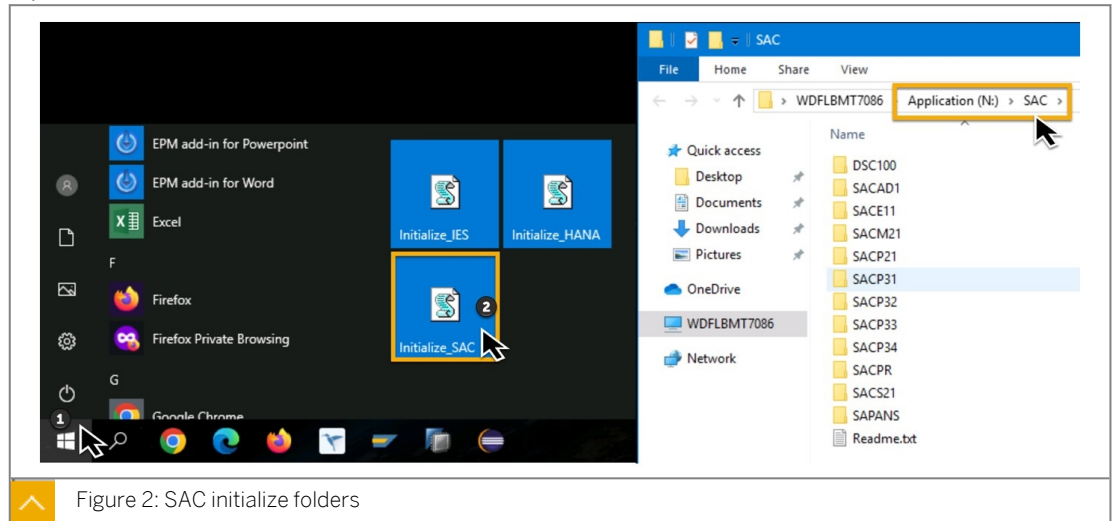

Figure 2: SAC initialize folders

7. Known System Issues

8. Additional Hints And Tips For Exercises of This Course

IMPORTANT: Please always complete the exercise you are working on before you suspend the system to avoid potential system inconsistencies and failure.

Save often, when issues arise first refresh the page, or close browser and clear cache when issues persist.

For Demos, please use the corresponding Exercise, or part of the Exercise.

There are several procedures in the course that you should use as demos. It is very important to demo the SAC add-in procedure.

Depending on the audience, you may make some exercises *Optional*, even those that are not noted as being *Optional*. Use your best judgment based on the participants in the course.

Note:

Comment exercise: if needed, log on as the admin and change the sharing access for all users to include view and add comments.

Note:

When using stories with the HANA Pacifica calculation views / live models, it is important to have a fresh SAC browser for the single sign-on to work properly. Otherwise the SAC / NetWeaver pop-up appears. To avoid this issue, the SAC browser should be reloaded or re-started.

Note:

When using live models or importing from a Universe, the connection may prompt for a user & password. If so, go to connections → edit the connection → choose saml single sign on. If you need the user, it is SAC & Welcome1.

Note:

The filter for All Files, Owned by Me, and Shared with Me is on the upper left in the Files area. When you try to access the Public folder and you don't see it, make sure that the filter is set to All Files.

Note:

When you demo the SAC add in, follow the procedure. If the SAC Analytics Cloud tab does not appear, go to Insert → Addins → Store → Search for SAC → Install. If you get an error when trying to log on, go to Insert → Addins → Choose ... next to the sap sac addin → Remove → Store → Search for SAC → Install.
