

Practical Assignment – LGN5822

The "agridat" package in R is a collection of datasets related to agriculture and agronomic research.

- 1) Choose a dataset from the "agridat" package.
- 2) Explain this dataset and justify your choice.
- 3) Define a hypothesis to be tested.
- 4) Develop a statistical methodology of your choice on this data set. Try to explore the database with interesting and important statistical analysis! Justify your choice.
- 5) Interpret your results.

Define groups of a maximum of 3 students or individually.

Create a presentation of what was done (Classroom Presentation: December 6, 2023).
