

# Cap 1 – Alguns exercícios resolvidos

# 1.6 - I

**1.6** Give state diagrams of AFDs recognizing the following languages. In all parts the alphabet is  $\{0,1\}$

1.  $\{w \mid \underline{w \text{ contains an even number of 0s}}, \text{ or } \underline{w \text{ contains exactly two 1s}}\}$

Vamos construir um AFD **M1** para a linguagem sublinhada em vermelho, um AFD **M2** para a linguagem sublinhada em azul, e deles construir o AFD da união

**M1:**

**M2:**

# 1.6 – I (cont.)

Pode ser mais fácil (para não se confundir) construir as transições olhando as tabelas de transição.

Note o highlight em amarelo as células usadas para a construção da transição  $\delta(A X, 0)$ :

Tabela completa:

Diagrama de estados:

		0	1
M1	A	B	A
	B	A	B
M2	X	X	Y
	Y	Y	Z
	Z	Z	W
	W	W	W
M1 U M2	AX	BX	
	AY		
	AZ		
	AW		
	BX		
	BY		
	BZ		
	BW		

		0	1
M1	A	B	A
	B	A	B
M2	X	X	Y
	Y	Y	Z
	Z	Z	W
	W	W	W
M1 U M2	AX	BX	AY
	AY	BY	AZ
	AZ	BZ	AW
	AW	BW	AW
	BX	AX	BY
	BY	AY	BZ
	BZ	AZ	BW
	BW	AW	BW

# 1.10 c)

**1.10** Use the construction given in the proof of Theorem 1.49 to give the state diagrams of AFNs recognizing the star of the language described in

**c.** Exercise 1.6m.  $\longrightarrow$  **m.** The empty set
