CR: Number of Cited References: Total number of cited references in the bibliography of the paper.

LCR: Local Cited References: Number of records in the collection that are cited by the paper. This number is an indication of the relevance of the paper to the collection.

LCS: Local Citation Score: Number of citations to the paper from within the collection.

GCS: Global Citation Score: Number of citations to the paper from all sources, as reported in Web of Science when the data was downloaded.
