“Contributing to social progress through sharing and capitalising on knowledge acquired in the field”

This is the founding principle of Resolis, a nonprofit organisation created in 2010.

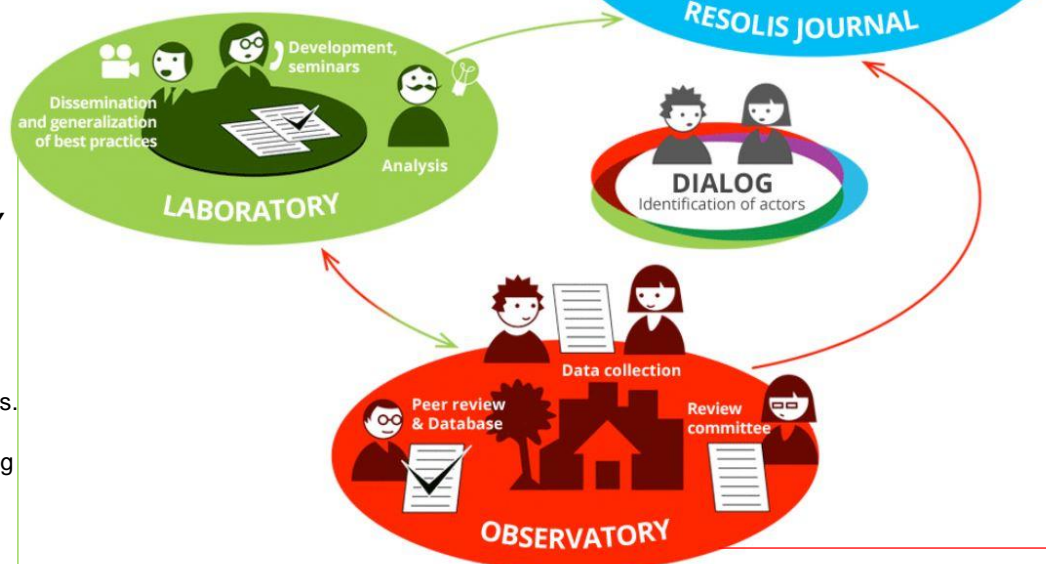

Activities that take place in the field in the solidarity sector are often ignored, when in fact they can be sources of real social innovation. Given this situation, Resolis has developed tools to track, enhance and capitalise on local best practice.

Using these tools, Resolis is currently running the following programs:

- Poverty in France
- The Fight against Energy Poverty
- Responsible and Sustainable Food
- Education and Knowledge to fight Poverty

RESOLIS is organised into three units :

After peer-review, the **RESOLIS JOURNAL** publishes the results of the innovative field actions and comments on their ability to be scaled up. It is intended to be an interactive discussion platform for the workers involved in social action in France and abroad.

The **LABORATORY** researches and defines innovative actions from an ethical standpoint in order to address modern social issues. RESOLIS' fellow members, depending on their skills and experience, help to create programs directly inspired by the knowledge and good practice that the Observatory highlights. These actions will then be distributed to the public in conferences or through publications.

The **OBSERVATORY** identifies innovative field actions and capitalises on the detailed feedback from field operators. After scientific validation, this information is published as a Fact Sheet in a free access data base.

The internationally renowned members are drawn from various fields (public sector, academic, business, civil society) and take an active part in the management of RESOLIS' programs.

Marie-Aline Bloch, Educational Innovation and Research Director of the EHESP (School of Advanced Studies in Public Health)

Michèle Boccoz, French Ambassador

Hervé Bouzanquet, Former Manager Director of a Company

Michel Brugière, Member of the administrative board of the Primo Levi Foundation (former President), Former Director of Doctors of the World (Médecins du Monde)

Pierre Corvol, Physician, Professor emeritus at the Collège de France, Honorary Trustee

Hervé Defalvard, Social Economy and Solidarity Professor at the University of Paris-Est Marne-la-Vallée

Antonella Cellot-Desneux, Strategic Projects Development Director at Biotherapy Institute -AFM-Téléthon

Amina Essaïdi, Popular Sectors project Director, Fédération Sportive et Gymnique du Travail (FSGT)

Jacques Glowinski, Professor emeritus at the Collège de France, Honorary Trustee

Jacques Guérin, Consultant- Coach for business development

Daniel Hurstel, International Business Lawyer

Dominique Kerouedan, "Knowledge against Poverty" Chairholder at the Collège de France in 2012-2013

Philippe Kourilsky, Professor emeritus at the Collège de France

Henry Laurens, Historian, Professor at the Collège de France

Soumia Malinbaum, Associate Director in charge of Business Development for the KEYRUS Group

Pierre Masson, Lawyer

Pascal Oger, Regional Director, INSEE Rhône-Alpes

« RESOLIS was established with the idea that knowledge can be used to promote social progress. Field actions with a social goal are plentiful and many are innovative, but knowledge and good practice are not shared nor structured adequately. This undermines the effectiveness and visibility of these actions.

RESOLIS wants to create a "science of field action" by applying the golden rule of science: the systematic capitalisation of knowledge through the peer-reviewed publication of results. This would allow the field workers to receive better recognition and their actions to have a larger impact."

Philippe Kourilsky - Founder and President of RESOLIS - Professor Emeritus at the Collège de France
