Studies in Constraint-Based Lexicalism

A series edited by

Miriam Butt, *University of Konstanz*

Tracy Holloway King, *Palo Alto Research Center*

Jean-Pierre Koenig, *State University of New York at Buffalo*

The aim of this series is to make work in various nonderivational, lexicalist approaches to grammar available to a wide audience of linguists. In approaches of this kind, grammar is seen as the interaction of constraints from multiple dimensions of linguistic substance, including information about syntactic category, grammatical relations, and semantic and pragmatic interpretation.
