

MCM5952 – 2023 – Evaluation

Each student must write a project, related to his or her own research or scientific interest, that contemplates metabolic pathways explored during this course.

The project must have a clear premise and hypothesis, must address the metabolic context and concepts involved besides the research topic to be addressed, clearly linking both; objectives; experimental plan; expected results. It is mandatory to also present a graphical abstract.

The text must be written in English and have a total of 6 pages. One of the pages will be the graphical abstract.

The project must be turned in until May 14th, sent by email to alepique@icb.usp.br.

Important, we will test text similarity.
