The dashboard displays a map of Aveiro with several data panels:

- Radars Vehicles (4):** A list of vehicles with icons and IDs: Vehicle 33014, Vehicle 33015, Vehicle 33016 (highlighted), and Vehicle 33017.
- Camera Objects (1):** A list showing 'Car: 5 (60.8%)' highlighted in yellow.
- Lidar Objects (0):** An empty list.
- Vehicle 33016 Details:** A panel on the right showing:
 - LOCATION:** 40.63202, -8.64843
 - VEHICLE TYPE:** medium
 - LENGTH:** 5.60 METERS
 - SOURCE APU:** p33
 - HEADING:** 5.84 DEGREES
 - SPEED:** 26.64 KM/H
 - LAST UPDATED:** Invalid Date (N/A)
 - RECORD:** 23, ...

SPECTRAL PROBES

The technological lab (Aveiro Tech City Living Lab) is an advanced large scale infrastructure, spanned all over the city of Aveiro, at the service of researchers, digital industries, start-ups, scaleups, R&D centres, entrepreneurs and other stakeholders interested in developing, testing or demonstrating concepts, products or services. This infrastructure integrates people, through their mobile phones, sensors and vehicles, such as automobiles, bicycles in the city and "moliceiros" in the Aveiro Lagoon, aerial and aquatic drones.

A Internet das Coisas (IoT) pode ser compreendida como um conjunto de tecnologias de comunicação, processamento e armazenamento em grande escala capazes de interconectar dispositivos e objetos à Internet, os quais, por meio de transdutores e atuadores, adquirem a capacidade de integrar o mundo físico e virtual.

R. Khan, S. U. Khan, R. Zaheer, and S. Khan, "Future internet: the internet of things architecture, possible applications and key challenges", in Frontiers of Information Technology (FIT), 2012 10th International Conference on. IEEE, 2012, pp. 257–260.

Requisitos

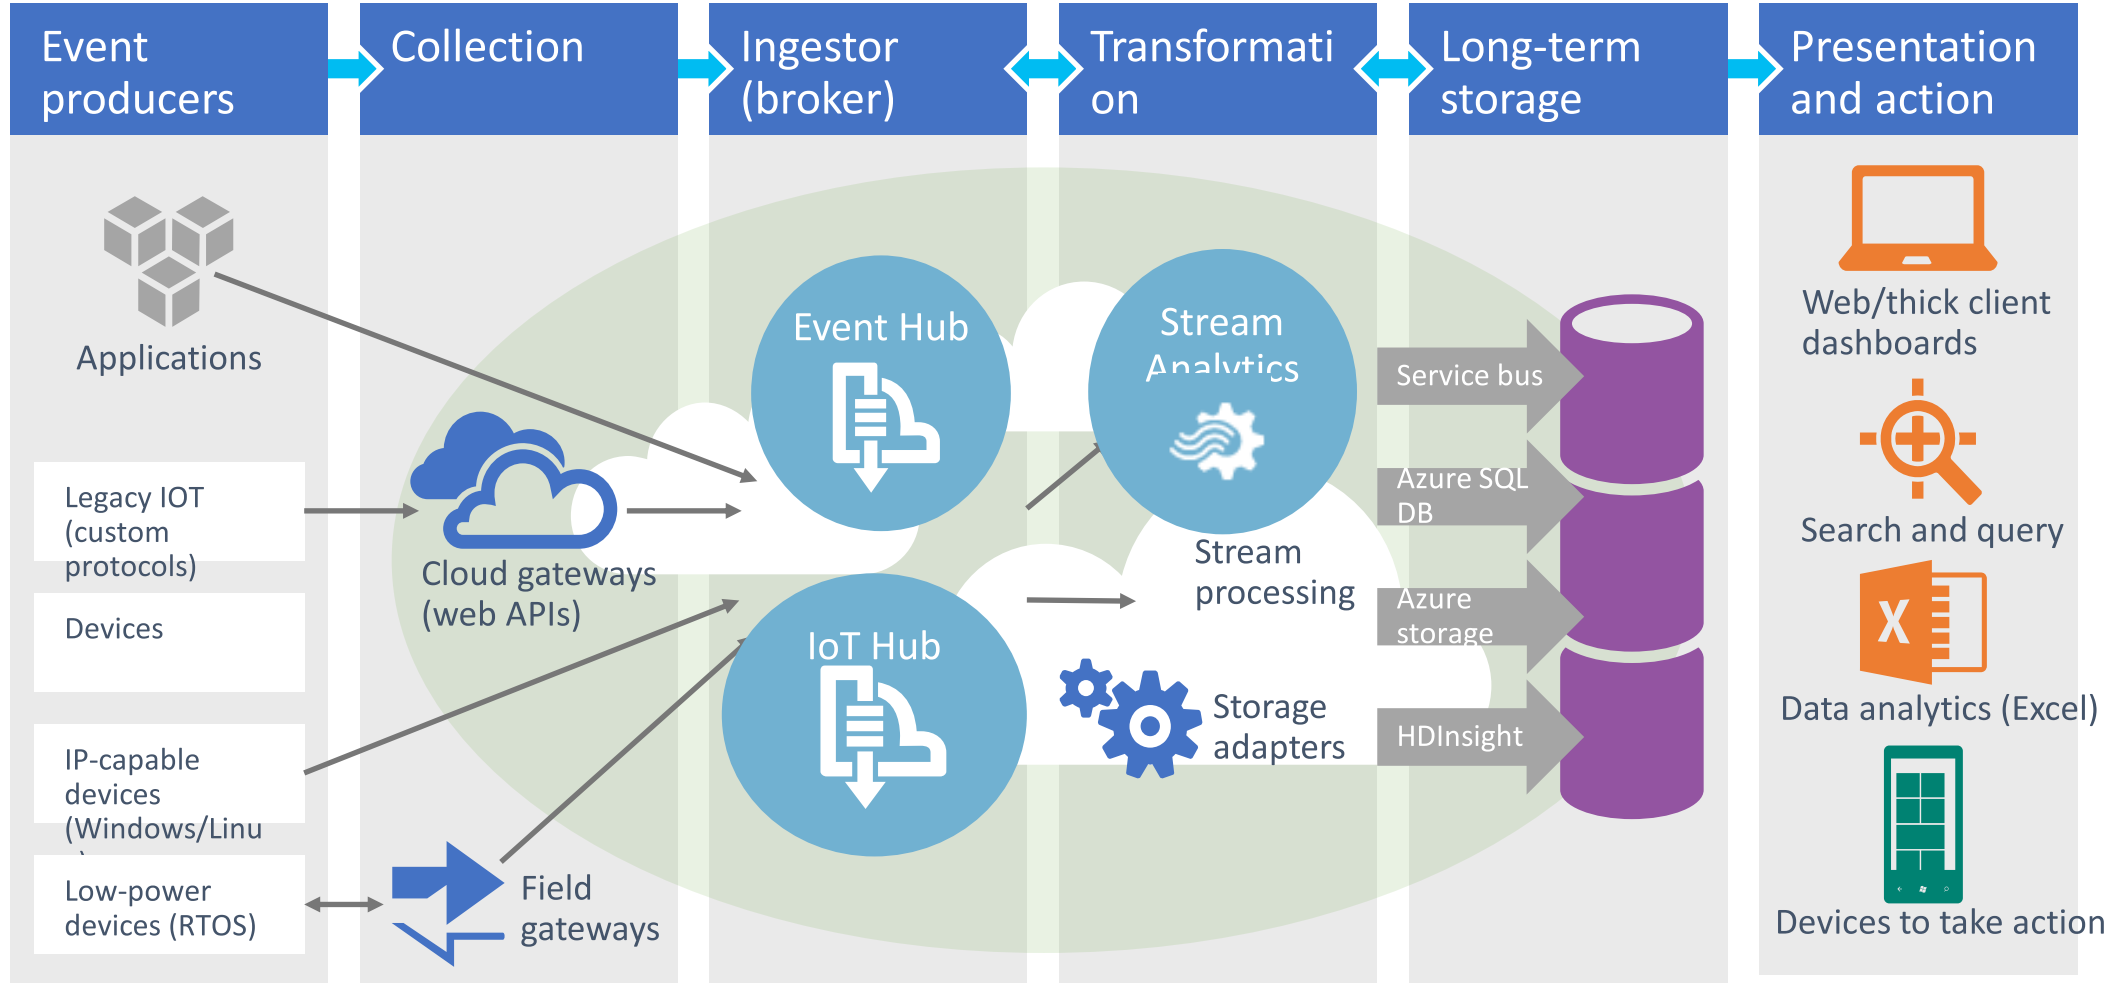

IBM Cloud

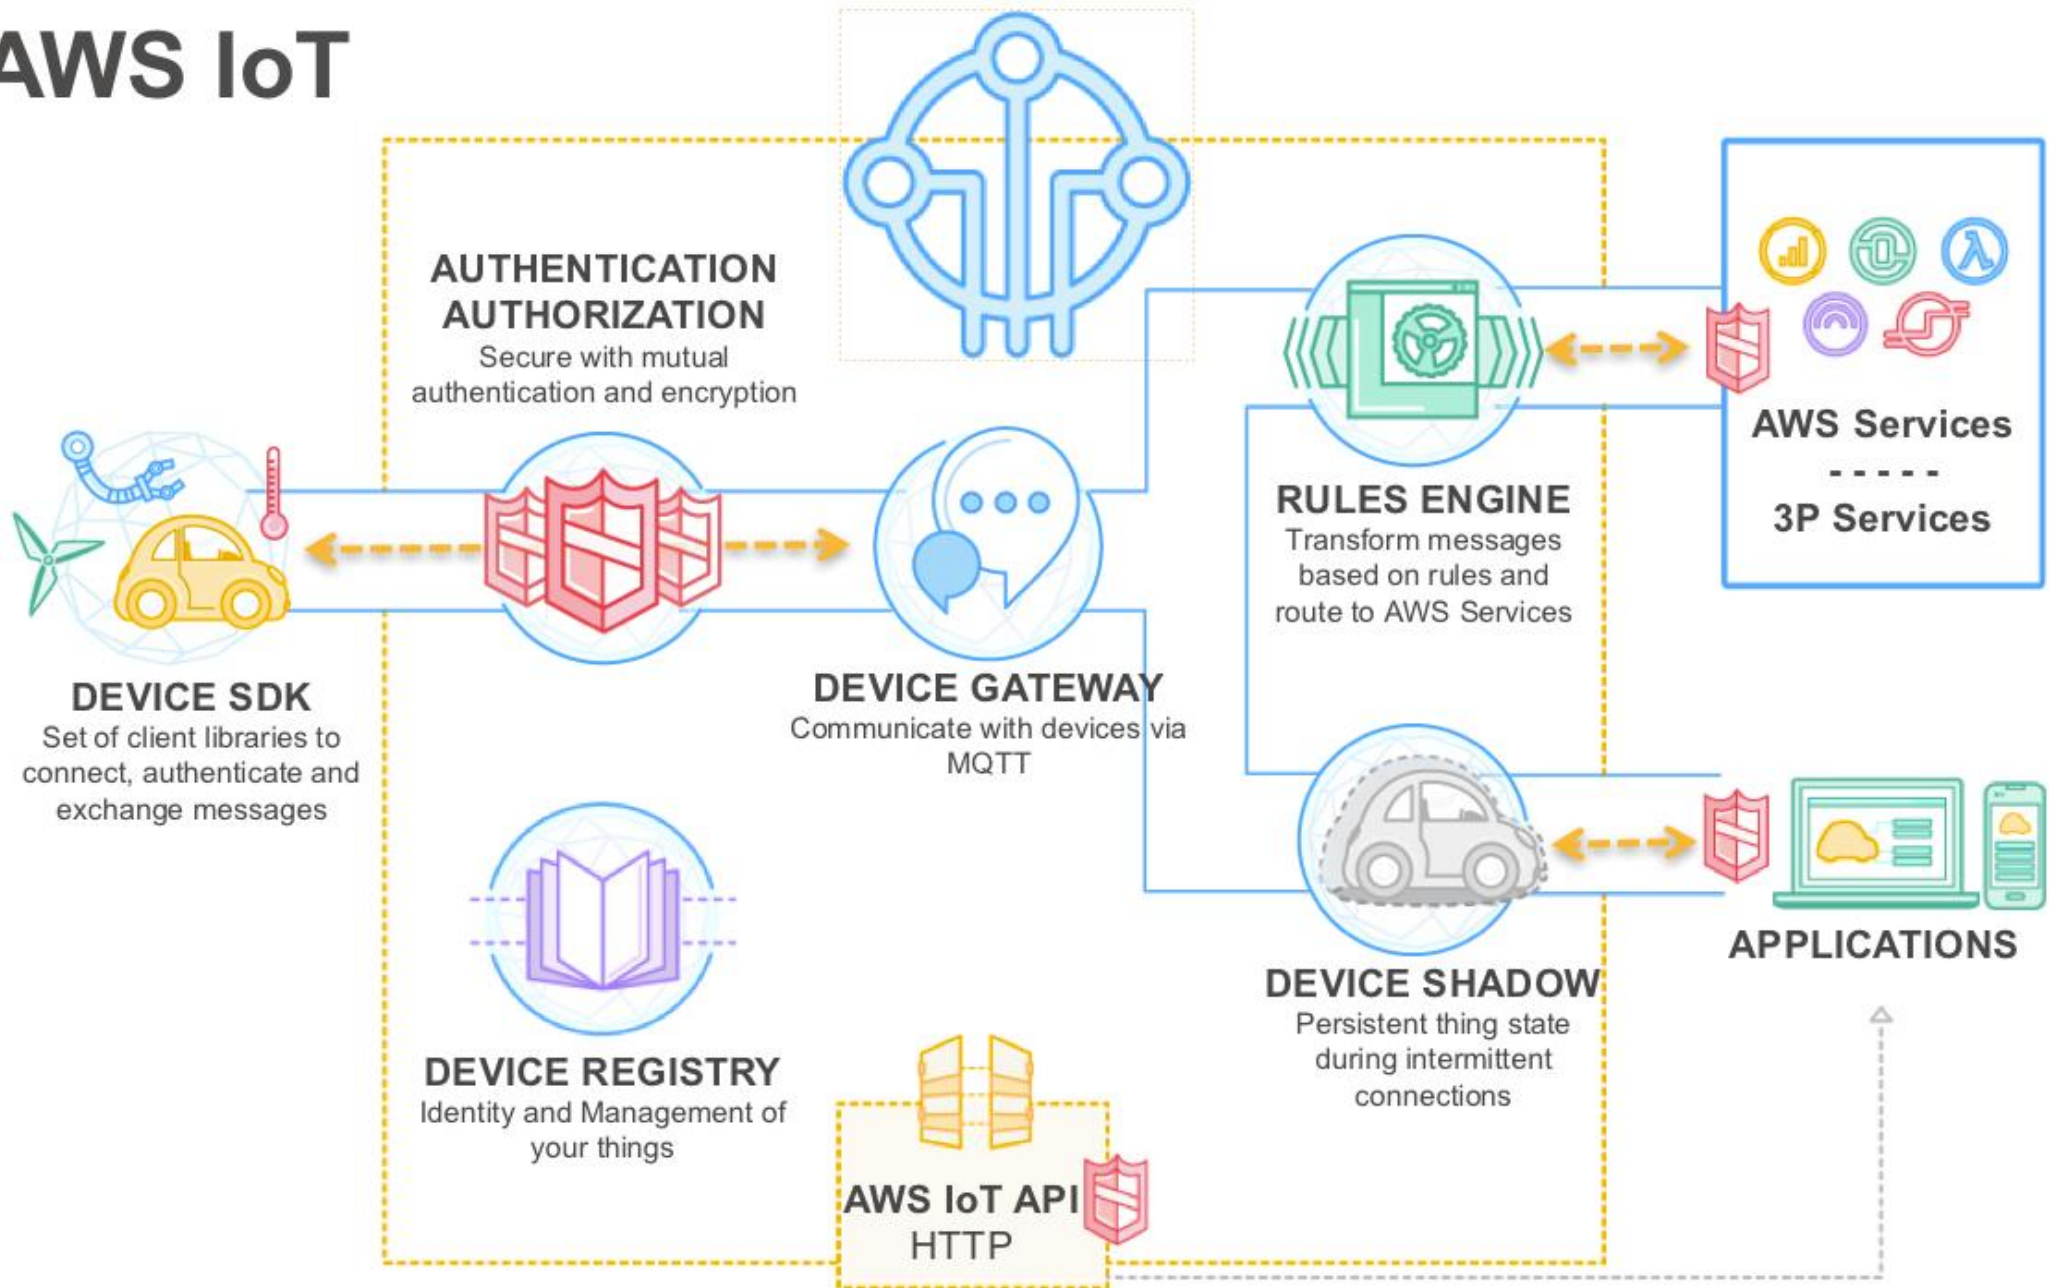

Microsoft Azure

AWS IoT

Your device or gateway

We start with your device, be it a sensor, a gateway or something else. To find out how to get it connected, search our recipes.

MQTT

Your device data is sent securely up to the cloud using the open, lightweight MQTT messaging protocol.

IBM Watson IoT Platform

This is the hub of all things IBM IoT. This is where you can setup and manage your connected devices so that your apps can access their live and historical data.

REST & Real-time APIs

Use our secure APIs to connect your apps with the data coming from your devices.

Your application and analytics

Create applications within IBM Bluemix, another cloud, or your own servers to interpret the data you now have access to!

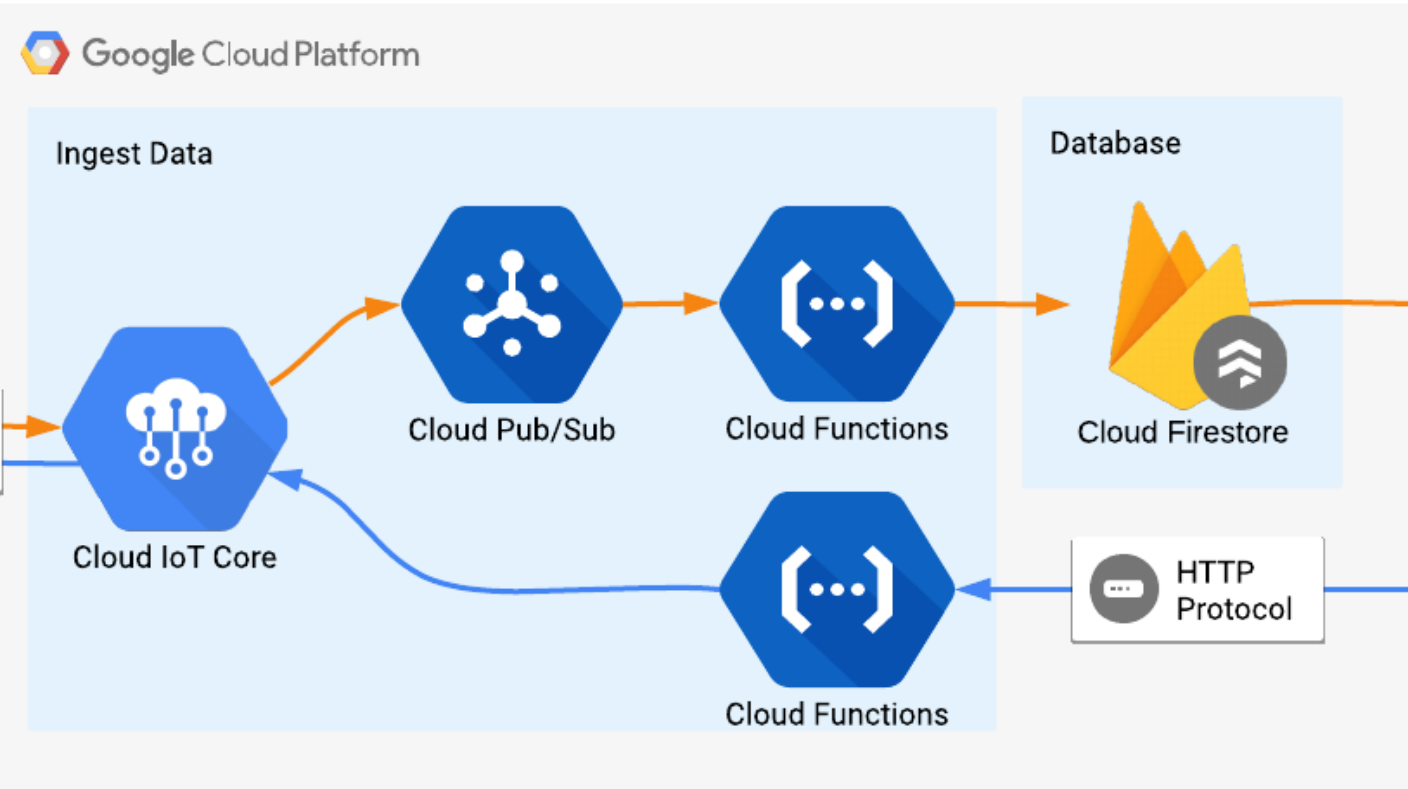

Device to Cloud

Asset Tracker - Device & Sensors

Webapp Firebase Hosting

Cloud to Device

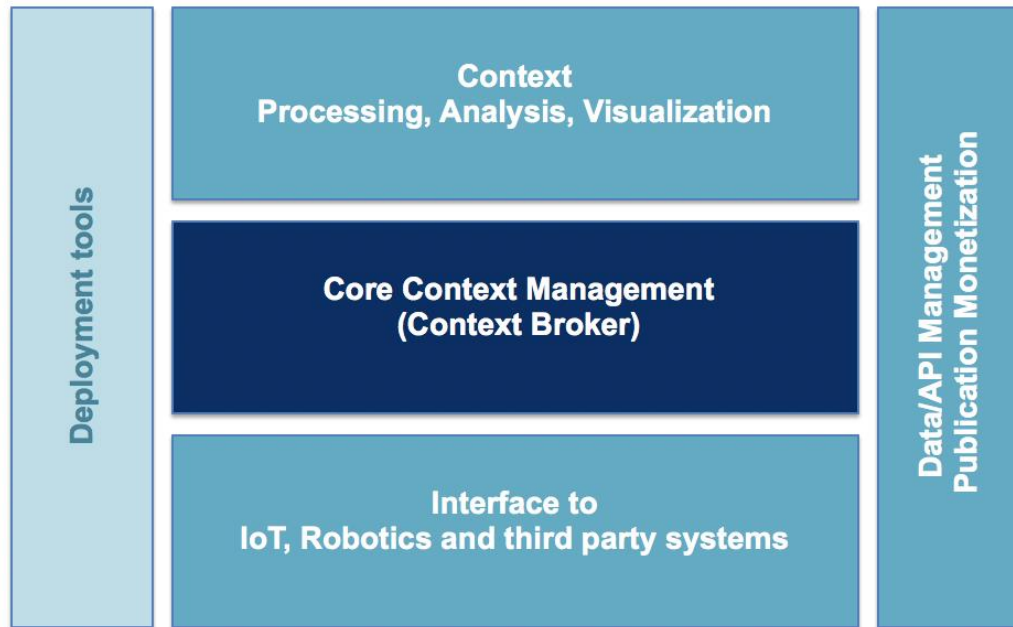

www.fiware.org

The Open Source platform for our smart digital future.

FIWARE

O FIWARE é uma plataforma aberta que pode ser utilizada para suportar aplicações de IoT e Ambientes Inteligentes, apresenta uma arquitetura modular e padronizada para coletar, processar, armazenar e compartilhar informações de contexto em tempo de execução.

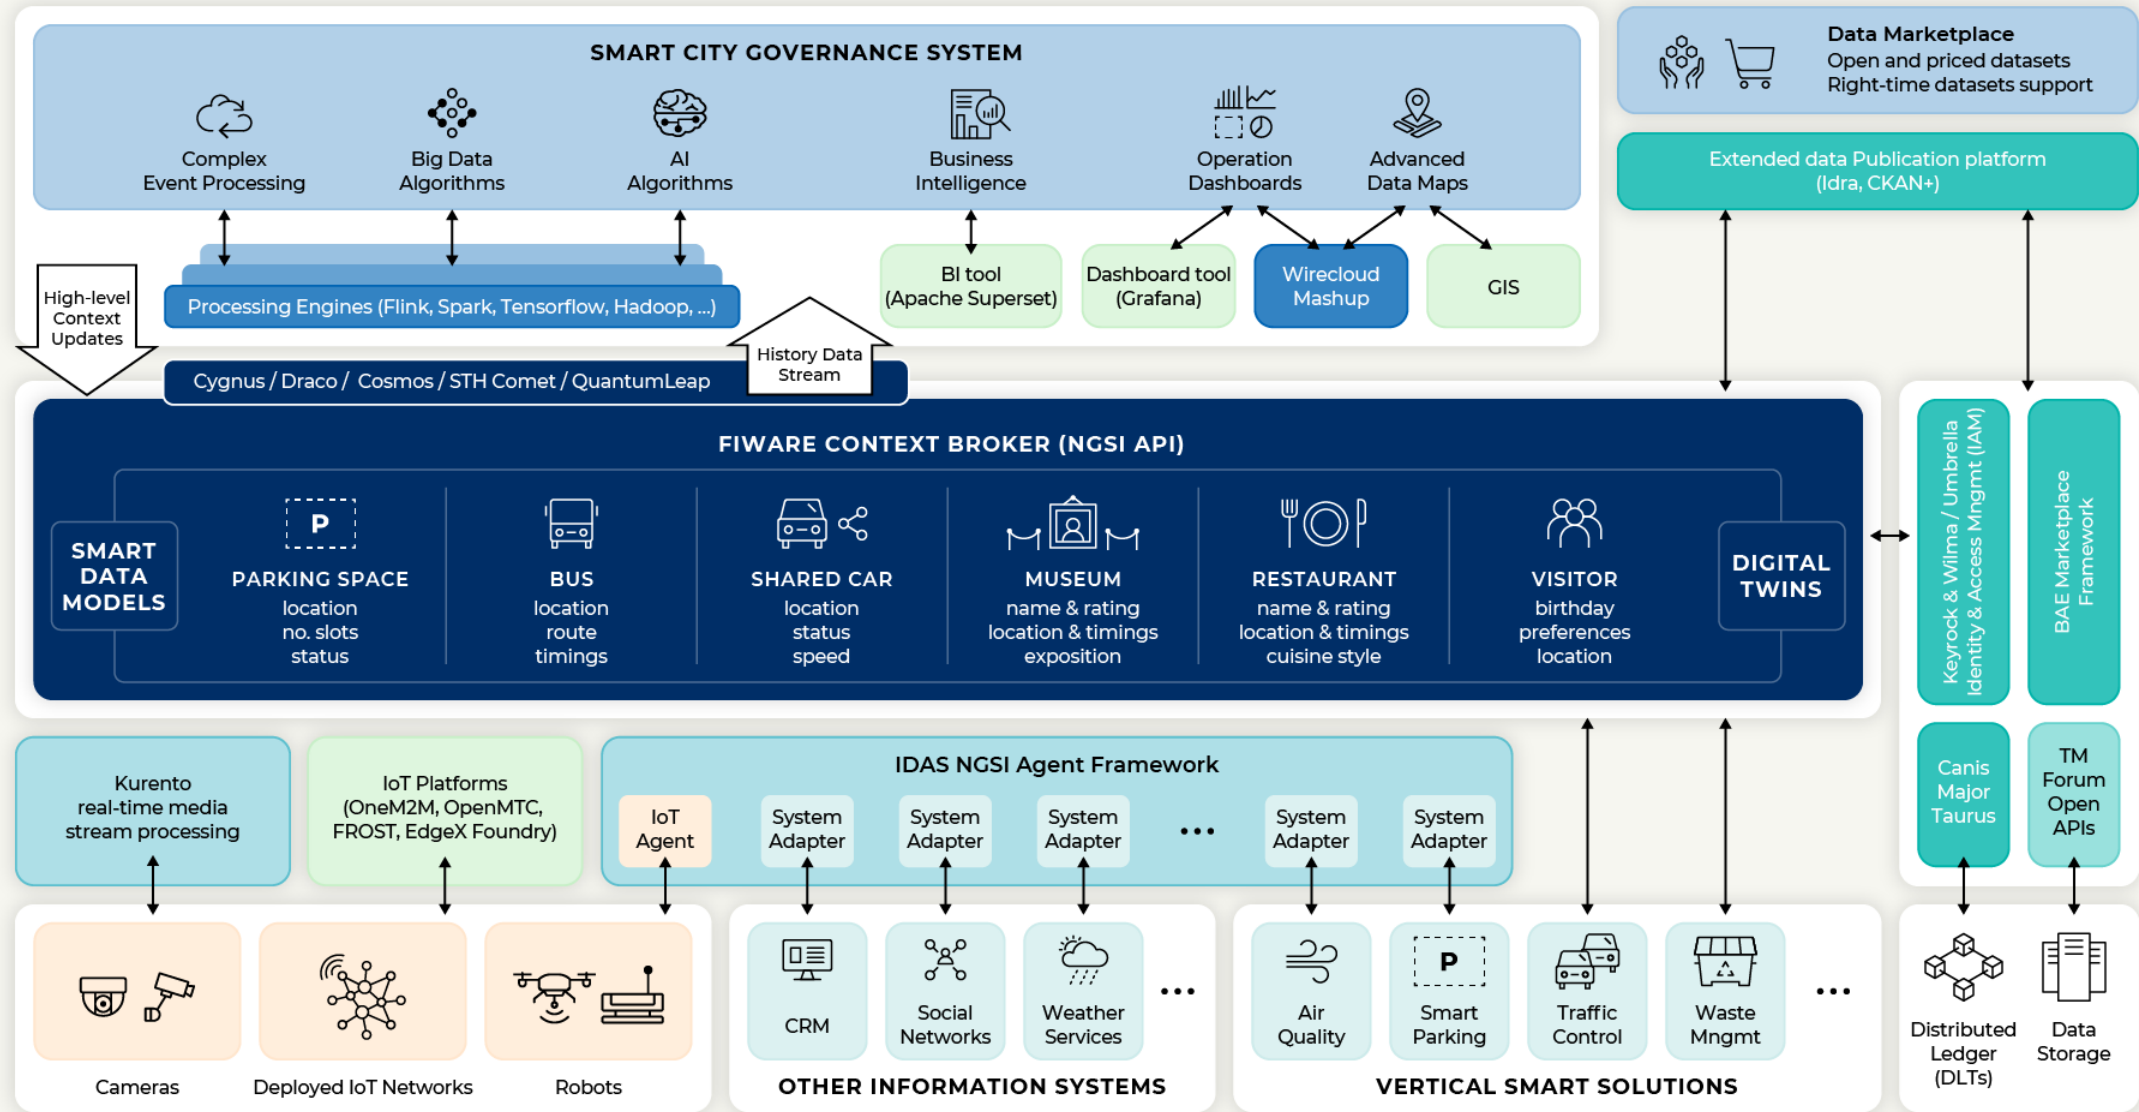

Oferece recursos avançados e sua implementação utiliza tecnologias e padrões abertos.
